

JAINODDIN SHAIK

FULL STACK DEVELOPER & SOFTWARE ARCHITECT

Hyderabad, India | +91 79890 15462 | skjainoddin36654@gmail.com | github.com/jainoddin | linkedin.com/in/sk-jainoddin-800060250 | jainoddin.dev

PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer & Architect** with extensive production experience building scalable, high-performance web applications using **React.js, Next.js, TypeScript, Rust, Node.js, and PostgreSQL**. Proven track record architecting and deploying production AI SaaS platforms (QuickTool), real-time global news intelligence engines (TodayAround), self-hosted database engines in Rust (TorvaDB), and educational systems (Tansy Academy). Expert in REST & WebSocket APIs, Core Web Vitals optimization, and leading collaborative Agile sprints.

TECHNICAL SKILLS

Frontend: React.js, Next.js (App Router, SSR, SSG), TypeScript, JavaScript (ES6+), Tailwind CSS, Redux Toolkit, HTML5, CSS3
Backend: Node.js, Express, Rust (Actix-web), Next.js API Routes, RESTful APIs, WebSockets, Socket.IO, JWT Authentication
Databases: PostgreSQL, MySQL, MongoDB, Redis, Schema Design, B-Tree Indexing, ACID Transactions, Query Tuning
Cloud & Tools: Docker, Git, Bitbucket, Vercel, Postman, Linux, CI/CD Pipelines, Chrome DevTools, Figma, Google Gemini AI API

WORK EXPERIENCE

Full Stack Developer — Tansy Solutions LLC-FZ

Remote | Jun 2025 – Present

- Architect scalable web applications using **Next.js, React.js, TypeScript**, and modern cloud technologies.
- Construct reusable, accessible, and responsive component libraries from Figma specs using **Tailwind CSS**, cutting UI delivery turnaround by 30%.
- Design and implement resilient **Next.js API Routes** and high-throughput RESTful microservices with JWT authorization and PostgreSQL data management.
- Spearhead frontend performance tuning and Core Web Vitals optimization, achieving **95+ Google Lighthouse scores** across production platforms.

FEATURED PROJECTS

QuickTool — All-in-One AI Productivity SaaS Platform

quicktool.space

Tech: Next.js 15, TypeScript, Node.js, MongoDB, Google Gemini AI API, Tailwind CSS

- Built a flagship production AI SaaS platform featuring **100+ active AI tools** (writing, code optimizer, image processing, PDF utilities).
- Integrated **Google Gemini AI API** with real-time streaming tokens, intelligent rate-limiting, usage analytics, and graceful fallback handlers.
- Created a high-productivity side-by-side workspace with live Markdown rendering, instant multi-format export, and 98+ Core Web Vitals.

TodayAround — Real-Time Global Intelligence & News Aggregator

todayaround.world

Tech: Next.js, TypeScript, Rust (Actix-web), Tailwind CSS, Redis, REST APIs

- Engineered a high-frequency worldwide intelligence dashboard delivering live global news feeds, weather radar, sports, and financial market tickers.
- Developed concurrent scraping and normalization microservices in **Rust (Actix-web)**, achieving sub-50ms API delivery under high request volumes.
- Implemented client-side cache layers and background route prefetching in Next.js, eliminating screen flicker during channel switches.

TorvaDB — High-Performance Self-Hosted Database Engine & Studio

torvadb.vercel.app

Tech: Rust, Next.js, TypeScript, SQL Engine, WebSockets, Tailwind CSS

- Authored an ACID-compliant database engine in **Rust** from scratch with Write-Ahead Logging (WAL) and custom B-Tree file storage structures.
- Developed a complete SQL lexer, AST parser, and query evaluator handling SELECT, INSERT, UPDATE, DELETE, and relational JOIN operations.
- Engineered a modern web studio in **Next.js & TypeScript** for visual query benchmarking, real-time memory telemetry, and schema visualization via WebSockets.

Tansy Academy — Interactive SQL & Database Training Platform

tansyacademy.com

Tech: Eleventy (11ty), Nunjucks, JavaScript, HTML5, CSS3, SQL

- Created an interactive online SQL training platform designed for non-IT professionals with interactive tutorials and sandbox schema playgrounds.
- Optimized static site generation (SSG) pipeline for blazing fast sub-second page loads, zero client JS bloat, and 100/100 Lighthouse performance.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Hyderabad, Telangana, India
